

## **MGAT4A Blocking Peptide (N-Term)**

Synthetic peptide Catalog # BP22052a

## **Specification**

## MGAT4A Blocking Peptide (N-Term) - Product Information

Primary Accession <u>Q9UM21</u>

Other Accession <u>Q5F407</u>, <u>Q4R854</u>, <u>Q5REP8</u>

## MGAT4A Blocking Peptide (N-Term) - Additional Information

Gene ID 11320

### **Other Names**

Alpha-1, 3-mannosyl-glycoprotein 4-beta-N-acetylglucosaminyltransferase A, 2.4.1.145, N-glycosyl-oligosaccharide-glycoprotein N-acetylglucosaminyltransferase IVa, GlcNAc-T IVa, GnT-IVa, N-acetylglucosaminyltransferase IVa, UDP-N-acetylglucosamine: alpha-1, 3-D-mannoside beta-1, 4-N-acetylglucosaminyltransferase IVa, Alpha-1, 3-mannosyl-glycoprotein 4-beta-N-acetylglucosaminyltransferase A soluble form, MGAT4A

## Target/Specificity

The synthetic peptide sequence is selected from aa 90-102 of HUMAN MGAT4A

### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

## **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

# MGAT4A Blocking Peptide (N-Term) - Protein Information

Name MGAT4A (HGNC:7047)

### **Function**

Glycosyltransferase that catalyze the transfer of GlcNAc from UDP-GlcNAc to the GlcNAcbeta1-2Manalpha1-3 arm of the core structure of N-linked glycans through a beta1-4 linkage and participates in the production of tri- and tetra-antennary N-linked sugar chains (PubMed:<a href="http://www.uniprot.org/citations/17006639" target="\_blank">17006639</a>). Involved in glucose transport by mediating SLC2A2/GLUT2 glycosylation, thereby controlling cell-surface expression of SLC2A2 in pancreatic beta cells (By similarity).

## **Cellular Location**

[Alpha-1,3-mannosyl-glycoprotein 4-beta-N- acetylglucosaminyltransferase A]: Golgi apparatus membrane {ECO:0000250|UniProtKB:Q9D4R2}; Single-pass type II membrane protein

## {ECO:0000250|UniProtKB:Q9D4R2}

## **Tissue Location**

Expressed in pancreas, spleen, thymus, prostate, small intestine, peripheral blood leukocytes and lymph node. Strongly overexpressed in choriocarcinoma cancer cell lines. Down-regulated in pancreatic cancer.

# MGAT4A Blocking Peptide (N-Term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

## MGAT4A Blocking Peptide (N-Term) - Background

Glycosyltransferase that participates in the transfer of N-acetylglucosamine (GlcNAc) to the core mannose residues of N- linked glycans. Catalyzes the formation of the GlcNAcbeta1-4 branch on the GlcNAcbeta1-2Manalpha1-3 arm of the core structure of N-linked glycans. Essential for the production of tri- and tetra-antennary N-linked sugar chains. Involved in glucose transport by mediating SLC2A2/GLUT2 glycosylation, thereby controlling cell-surface expression of SLC2A2 in pancreatic beta cells.
