

WIF1 Antibody(Human C-term) Blocking peptide
Synthetic peptide
Catalog # BP2723b**Specification**

WIF1 Antibody(Human C-term) Blocking peptide - Product InformationPrimary Accession [Q9Y5W5](#)**WIF1 Antibody(Human C-term) Blocking peptide - Additional Information****Gene ID** 11197**Other Names**

Wnt inhibitory factor 1, WIF-1, WIF1

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP2723b](/product/products/AP2723b) was selected from the Human region of human WIF1 (Human C-term). A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

WIF1 Antibody(Human C-term) Blocking peptide - Protein Information**Name** WIF1**Function**

Binds to WNT proteins and inhibits their activities. May be involved in mesoderm segmentation.

Cellular Location

Secreted.

WIF1 Antibody(Human C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

WIF1 Antibody(Human C-term) Blocking peptide - Images**WIF1 Antibody(Human C-term) Blocking peptide - Background**

WNT proteins are extracellular signaling molecules involved in the control of embryonic development. WIF1 is a secreted protein, which binds WNT proteins and inhibits their activities. This protein contains a WNT inhibitory factor (WIF) domain and 5 epidermal growth factor (EGF)-like domains. It may be involved in mesoderm segmentation. This protein is found to be present in fish, amphibia and mammals.
