

## FKBP3 Antibody (C-term) Blocking Peptide

Synthetic peptide Catalog # BP2784b

## **Specification**

# FKBP3 Antibody (C-term) Blocking Peptide - Product Information

Primary Accession

Q00688

# FKBP3 Antibody (C-term) Blocking Peptide - Additional Information

**Gene ID 2287** 

#### **Other Names**

Peptidyl-prolyl cis-trans isomerase FKBP3, PPlase FKBP3, 25 kDa FK506-binding protein, 25 kDa FKBP, FKBP-25, FK506-binding protein 3, FKBP-3, Immunophilin FKBP25, Rapamycin-selective 25 kDa immunophilin, Rotamase, FKBP3, FKBP25

### Target/Specificity

The synthetic peptide sequence used to generate the antibody <a href=/products/AP2784b>AP2784b</a> was selected from the C-term region of human FKBP3. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

# FKBP3 Antibody (C-term) Blocking Peptide - Protein Information

Name FKBP3

Synonyms FKBP25

### **Function**

FK506- and rapamycin-binding proteins (FKBPs) constitute a family of receptors for the two immunosuppressants which inhibit T-cell proliferation by arresting two distinct cytoplasmic signal transmission pathways. PPlases accelerate the folding of proteins.

# **Cellular Location**

Nucleus.

## FKBP3 Antibody (C-term) Blocking Peptide - Background

FKBP3 is a member of the immunophilin protein family, which play a role in immunoregulation and basic cellular processes involving protein folding and trafficking. This protein is a cis-trans prolyl isomerase that binds the immunosuppressants FK506 and rapamycin, as well as histone deacetylases, the transcription factor YY1, casein kinase II, and nucleolin. It has a higher affinity for rapamycin than for FK506 and thus may be an important target molecule for immunosuppression by rapamycin.
