

# JTV1 Antibody (N-term) Blocking Peptide

Synthetic peptide Catalog # BP2861a

## **Specification**

## JTV1 Antibody (N-term) Blocking Peptide - Product Information

**Primary Accession** 

013155

# JTV1 Antibody (N-term) Blocking Peptide - Additional Information

**Gene ID 7965** 

#### **Other Names**

Aminoacyl tRNA synthase complex-interacting multifunctional protein 2, Multisynthase complex auxiliary component p38, Protein JTV-1, AIMP2, JTV1

## Target/Specificity

The synthetic peptide sequence used to generate the antibody <a href=/products/AP3261a> AP3261a> was selected from the Nator

href=/products/AP2861a>AP2861a</a> was selected from the N-term region of human JTV1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

# **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

### JTV1 Antibody (N-term) Blocking Peptide - Protein Information

Name AIMP2

Synonyms JTV1

### **Function**

Required for assembly and stability of the aminoacyl-tRNA synthase complex (PubMed:<a href="http://www.uniprot.org/citations/19131329" target="\_blank">19131329</a>). Mediates ubiquitination and degradation of FUBP1, a transcriptional activator of MYC, leading to MYC down-regulation which is required for aveolar type II cell differentiation. Blocks MDM2-mediated ubiquitination and degradation of p53/TP53. Functions as a proapoptotic factor.

### **Cellular Location**

Cytoplasm, cytosol. Nucleus {ECO:0000250|UniProtKB:Q8R010}. Note=Following DNA damage, dissociates from the aminoacyl-tRNA synthase complex and translocates from the cytoplasm to

the nucleus. {ECO:0000250|UniProtKB:Q8R010}

## JTV1 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

### • Blocking Peptides

JTV1 Antibody (N-term) Blocking Peptide - Images

# JTV1 Antibody (N-term) Blocking Peptide - Background

JTV1 is probable core protein of the multisynthetase complex that serves as a template for the assembly of the supramolecular structure. This protein Mediates ubiquitination of FUBP1 and its degradation by the proteasome.
