

### **EXO1** Antibody (N-term) Blocking Peptide

Synthetic peptide Catalog # BP2871a

#### **Specification**

## **EXO1 Antibody (N-term) Blocking Peptide - Product Information**

**Primary Accession** 

**Q9UQ84** 

# EXO1 Antibody (N-term) Blocking Peptide - Additional Information

**Gene ID 9156** 

#### **Other Names**

Exonuclease 1, hExo1, 31--, Exonuclease I, hExoI, EXO1, EXOI, HEX1

#### Target/Specificity

The synthetic peptide sequence used to generate the antibody <a href=/products/AP2871a>AP2871a</a> was selected from the N-term region of human EXO1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

### **EXO1** Antibody (N-term) Blocking Peptide - Protein Information

Name EXO1

Synonyms EXOI, HEX1

#### **Function**

5'->3' double-stranded DNA exonuclease which may also possess a cryptic 3'->5' double-stranded DNA exonuclease activity. Functions in DNA mismatch repair (MMR) to excise mismatch-containing DNA tracts directed by strand breaks located either 5' or 3' to the mismatch. Also exhibits endonuclease activity against 5'-overhanging flap structures similar to those generated by displacement synthesis when DNA polymerase encounters the 5'-end of a downstream Okazaki fragment. Required for somatic hypermutation (SHM) and class switch recombination (CSR) of immunoglobulin genes. Essential for male and female meiosis.

#### **Cellular Location**

Nucleus Note=Colocalizes with PCNA to discrete nuclear foci in S-phase

### **Tissue Location**

Highly expressed in bone marrow, testis and thymus. Expressed at lower levels in colon, lymph nodes, ovary, placenta, prostate, small intestine, spleen and stomach

### **EXO1 Antibody (N-term) Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

EXO1 Antibody (N-term) Blocking Peptide - Images

# EXO1 Antibody (N-term) Blocking Peptide - Background

EXO1 is a protein with 5' to 3' exonuclease activity as well as an RNase H activity. This protein is similar to the Saccharomyces cerevisiae protein Exo1 which interacts with Msh2 and which is involved in mismatch repair and recombination.
