

Phospho-IL3R(Y766) Antibody Blocking peptide
Synthetic peptide
Catalog # BP3133a**Specification**

Phospho-IL3R(Y766) Antibody Blocking peptide - Product InformationPrimary Accession [P32927](#)**Phospho-IL3R(Y766) Antibody Blocking peptide - Additional Information****Gene ID** 1439**Other Names**

Cytokine receptor common subunit beta, CDw131, GM-CSF/IL-3/IL-5 receptor common beta subunit, CD131, CSF2RB, IL3RB, IL5RB

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP3133a](/product/products/AP3133a) was selected from the region of human Phospho-IL3R-Y766. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

Phospho-IL3R(Y766) Antibody Blocking peptide - Protein Information**Name** CSF2RB**Synonyms** IL3RB, IL5RB**Function**

Cell surface receptor that plays a role in immune response and controls the production and differentiation of hematopoietic progenitor cells into lineage-restricted cells. Acts by forming a heterodimeric receptor through interaction with different partners such as IL3RA, IL5RA or CSF2RA (PubMed: [1495999](http://www.uniprot.org/citations/1495999)). In turn, participates in various signaling pathways including interleukin-3, interleukin-5 and granulocyte-macrophage colony-stimulating factor/CSF2 pathways. In unstimulated conditions, interacts constitutively with JAK1 and ligand binding leads to JAK1 stimulation and subsequent activation of the JAK- STAT pathway (PubMed: [9516124](http://www.uniprot.org/citations/9516124)).

Cellular Location

Membrane; Single-pass type I membrane protein.

Phospho-IL3R(Y766) Antibody Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

Phospho-IL3R(Y766) Antibody Blocking peptide - Images**Phospho-IL3R(Y766) Antibody Blocking peptide - Background**

IL3R (also known as CSF2RB) is a common beta chain of the high affinity receptor for IL-3, IL-5 and GM-CSF. Defective IL3R has been reported to be associated with protein alveolar proteinosis (PAP). PAP is an autosomal recessive fatal respiratory disease.
