

Phospho-S100A11(S6) Antibody Blocking peptide
Synthetic peptide
Catalog # BP3630a**Specification**

Phospho-S100A11(S6) Antibody Blocking peptide - Product InformationPrimary Accession [P31949](#)**Phospho-S100A11(S6) Antibody Blocking peptide - Additional Information****Gene ID** 6282**Other Names**

Protein S100-A11, Calgizzarin, Metastatic lymph node gene 70 protein, MLN 70, Protein S100-C, S100 calcium-binding protein A11, Protein S100-A11, N-terminally processed, S100A11, MLN70, S100C

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP3630a](/products/AP3630a) was selected from the region of human Phospho-S100A11-pS6. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

Phospho-S100A11(S6) Antibody Blocking peptide - Protein Information**Name** S100A11**Synonyms** MLN70, S100C**Function**

Facilitates the differentiation and the cornification of keratinocytes.

Cellular Location

Cytoplasm. Nucleus

Phospho-S100A11(S6) Antibody Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

Phospho-S100A11(S6) Antibody Blocking peptide - Background

Protein S100-A11 is a member of the S100 family of proteins containing 2 EF-hand calcium-binding motifs. S100 proteins are localized in the cytoplasm and/or nucleus of a wide range of cells, and involved in the regulation of a number of cellular processes such as cell cycle progression and differentiation. S100 genes include at least 13 members which are located as a cluster on chromosome 1q21. This protein may function in motility, invasion, and tubulin polymerization. Chromosomal rearrangements and altered expression of this gene have been implicated in tumor metastasis.
