

TELO2 Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP4808b**Specification**

TELO2 Antibody (C-term) Blocking Peptide - Product Information

Primary Accession [Q9Y4R8](#)

TELO2 Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 9894

Other Names

Telomere length regulation protein TEL2 homolog, Protein clk-2 homolog, hCLK2, TELO2, KIAA0683

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

TELO2 Antibody (C-term) Blocking Peptide - Protein Information

Name TELO2

Synonyms KIAA0683

Function

Regulator of the DNA damage response (DDR). Part of the TTT complex that is required to stabilize protein levels of the phosphatidylinositol 3-kinase-related protein kinase (PIKK) family proteins. The TTT complex is involved in the cellular resistance to DNA damage stresses, like ionizing radiation (IR), ultraviolet (UV) and mitomycin C (MMC). Together with the TTT complex and HSP90 may participate in the proper folding of newly synthesized PIKKs. Promotes assembly, stabilizes and maintains the activity of mTORC1 and mTORC2 complexes, which regulate cell growth and survival in response to nutrient and hormonal signals. May be involved in telomere length regulation.

Cellular Location

Cytoplasm. Membrane. Nucleus. Chromosome, telomere

TELO2 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

TELO2 Antibody (C-term) Blocking Peptide - Background

TELO2 is a protein that functions as an S-phase checkpoint protein in the cell cycle. The protein may also play a role in DNA repair.
