

FCGR1A Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP4930c**Specification**

FCGR1A Antibody (Center) Blocking Peptide - Product Information

Primary Accession [P12314](#)

FCGR1A Antibody (Center) Blocking Peptide - Additional Information

Gene ID 2209

Other Names

High affinity immunoglobulin gamma Fc receptor I, IgG Fc receptor I, Fc-gamma RI, FcRI, Fc-gamma RIA, FcgammaRIa, CD64, FCGR1A, FCG1, FCGR1, IGFR1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

FCGR1A Antibody (Center) Blocking Peptide - Protein Information

Name FCGR1A

Synonyms FCG1, FCGR1, IGFR1

Function

High affinity receptor for the Fc region of immunoglobulins gamma. Functions in both innate and adaptive immune responses. Mediates IgG effector functions on monocytes triggering antibody-dependent cellular cytotoxicity (ADCC) of virus-infected cells.

Cellular Location

Cell membrane; Single-pass type I membrane protein Note=Stabilized at the cell membrane through interaction with FCER1G

Tissue Location

Monocyte/macrophage specific.

FCGR1A Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

FCGR1A Antibody (Center) Blocking Peptide - Background

FCGR1A encodes a protein that plays an important role in the immune response. This protein is a high-affinity Fc-gamma receptor. The gene is one of three related gene family members located on chromosome 1.
