

CNNM4 Blocking Peptide (Center)

Synthetic peptide
Catalog # BP5419c

Specification

CNNM4 Blocking Peptide (Center) - Product Information

Primary Accession [O6P4O7](#)
Other Accession [NP_064569.3](#)

CNNM4 Blocking Peptide (Center) - Additional Information

Gene ID 26504

Other Names

Metal transporter CNNM4, Ancient conserved domain-containing protein 4, Cyclin-M4, CNNM4, ACDP4, KIAA1592

Target/Specificity

The synthetic peptide sequence is selected from aa 580-593 of HUMAN CNNM4

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

CNNM4 Blocking Peptide (Center) - Protein Information

Name CNNM4

Synonyms ACDP4, KIAA1592

Function

Probable metal transporter. The interaction with the metal ion chaperone COX11 suggests that it may play a role in sensory neuron functions (By similarity). May play a role in biomineralization and retinal function.

Cellular Location

Cell membrane; Multi-pass membrane protein

Tissue Location

Widely expressed. Highly expressed in heart.

CNNM4 Blocking Peptide (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

CNNM4 Blocking Peptide (Center) - Background

This gene encodes a member of the ancient conserved domain containing protein family. Members of this protein family contain a cyclin box motif and have structural similarity to the cyclins. The encoded protein may play a role in metal ion transport. Mutations in this gene are associated with Jalili syndrome which consists of cone-rod dystrophy and amelogenesis imperfecta. [provided by RefSeq].
