

PON2 Antibody (Center) Blocking peptide

Synthetic peptide Catalog # BP5760c

Specification

PON2 Antibody (Center) Blocking peptide - Product Information

Primary Accession <u>Q15165</u> Other Accession <u>NP_000296.2</u>

PON2 Antibody (Center) Blocking peptide - Additional Information

Gene ID 5445

Other Names

Serum paraoxonase/arylesterase 2, PON 2, Aromatic esterase 2, A-esterase 2, Serum aryldialkylphosphatase 2, PON2

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

PON2 Antibody (Center) Blocking peptide - Protein Information

Name PON2

Function

Capable of hydrolyzing lactones and a number of aromatic carboxylic acid esters. Has antioxidant activity. Is not associated with high density lipoprotein. Prevents LDL lipid peroxidation, reverses the oxidation of mildly oxidized LDL, and inhibits the ability of MM-LDL to induce monocyte chemotaxis.

Cellular Location

Membrane; Peripheral membrane protein

Tissue Location

Widely expressed with highest expression in liver, lung, placenta, testis and heart.

PON2 Antibody (Center) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

• Blocking Peptides

PON2 Antibody (Center) Blocking peptide - Background

PON2 is a member of the paraoxonase gene family, which includes three known members located adjacent to each otheron the long arm of chromosome 7. The encoded protein isubiquitously expressed in human tissues, membrane-bound, and mayact as a cellular antioxidant, protecting cells from oxidativestress. Hydrolytic activity against acylhomoserine lactones, important bacterial quorum-sensing mediators, suggests the encodedprotein may also play a role in defense responses to pathogenic bacteria. Mutations in this gene may be associated with vascular disease and a number of quantitative phenotypes related todiabetes.
