

Kinesin 5A (Kif5A) Antibody (C-term) Blocking peptide
Synthetic peptide
Catalog # BP6349b**Specification**

Kinesin 5A (Kif5A) Antibody (C-term) Blocking peptide - Product InformationPrimary Accession [Q12840](#)**Kinesin 5A (Kif5A) Antibody (C-term) Blocking peptide - Additional Information****Gene ID** 3798**Other Names**

Kinesin heavy chain isoform 5A, Kinesin heavy chain neuron-specific 1, Neuronal kinesin heavy chain, NKHC, KIF5A, NKHC1

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP6349b](/product/products/AP6349b) was selected from the C-term region of human Kif5A. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

Kinesin 5A (Kif5A) Antibody (C-term) Blocking peptide - Protein Information**Name** KIF5A**Synonyms** NKHC1**Function**

Microtubule-dependent motor required for slow axonal transport of neurofilament proteins (NFH, NFM and NFL). Can induce formation of neurite-like membrane protrusions in non-neuronal cells in a ZFYVE27-dependent manner. The ZFYVE27-KIF5A complex contributes to the vesicular transport of VAPA, VAPB, SURF4, RAB11A, RAB11B and RTN3 proteins in neurons. Required for anterograde axonal transportation of MAPK8IP3/JIP3 which is essential for MAPK8IP3/JIP3 function in axon elongation.

Cellular Location

Cytoplasm, perinuclear region {ECO:0000250|UniProtKB:Q6QLM7}. Cytoplasm, cytoskeleton

{ECO:0000250|UniProtKB:Q6QLM7}. Perikaryon {ECO:0000250|UniProtKB:Q6QLM7}.
Note=Concentrated in the cell body of the neurons, particularly in the perinuclear region
{ECO:0000250|UniProtKB:Q6QLM7}

Tissue Location

Distributed throughout the CNS but is highly enriched in subsets of neurons

Kinesin 5A (Kif5A) Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

Kinesin 5A (Kif5A) Antibody (C-term) Blocking peptide - Images**Kinesin 5A (Kif5A) Antibody (C-term) Blocking peptide - Background**

Kif5A is a member of the kinesin family of proteins. Members of this family are part of a multisubunit complex that functions as a microtubule motor in intracellular organelle transport. Mutations in this protein cause autosomal dominant spastic paraplegia 10.
