

Mouse GPR81-R203 Blocking Peptide
Synthetic peptide
Catalog # BP6362c**Specification**

Mouse GPR81-R203 Blocking Peptide - Product Information

Primary Accession [O8C131](#)
Other Accession [NP_780729](#)

Mouse GPR81-R203 Blocking Peptide - Additional Information

Gene ID 243270

Other Names

Hydroxycarboxylic acid receptor 1, G-protein coupled receptor 81, Hcar1, Gpr81

Target/Specificity

The synthetic peptide sequence is selected from aa 203~220 of MOUSE Hcar1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

Mouse GPR81-R203 Blocking Peptide - Protein Information

Name Hcar1

Synonyms Gpr81

Function

Acts as a receptor for L-lactate and mediates its anti- lipolytic effect through a G(i)-protein-mediated pathway.

Cellular Location

Cell membrane; Multi-pass membrane protein.

Tissue Location

Highly expressed in subcutaneous fat and omental fat and detectable in lower levels in brain and many other tissues High levels detected in epididymal and subcutaneous fat with slightly lower in omental fat, low levels are detected in the brain, skeletal muscle, kidney, liver and the pancreas (at protein level)

Mouse GPR81-R203 Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

Mouse GPR81-R203 Blocking Peptide - Images

Mouse GPR81-R203 Blocking Peptide - Background

G protein-coupled receptors (GPCRs, or GPRs) contain 7 transmembrane domains and transduce extracellular signals through heterotrimeric G proteins. Northern analyses revealed GPR81 expression in the pituitary.
