

Catalog # BP6506a

DPP8 Antibody (N-term) Blocking Peptide Synthetic peptide

Specification

DPP8 Antibody (N-term) Blocking Peptide - Product Information

Primary Accession

<u>Q6V1X1</u>

DPP8 Antibody (N-term) Blocking Peptide - Additional Information

Gene ID 54878

Other Names

Dipeptidyl peptidase 8, DP8, Dipeptidyl peptidase IV-related protein 1, DPRP-1, Dipeptidyl peptidase VIII, DPP VIII, Prolyl dipeptidase DPP8, DPP8, DPRP1

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP6506a was selected from the N-term region of human DPP8. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long to

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions This product is for research use only. Not for use in diagnostic or therapeutic procedures.

DPP8 Antibody (N-term) Blocking Peptide - Protein Information

Name DPP8 {ECO:0000303|PubMed:11012666, ECO:0000312|HGNC:HGNC:16490}

Function

Dipeptidyl peptidase that cleaves off N-terminal dipeptides from proteins having a Pro or Ala residue at position 2 (PubMed:11012666, PubMed:12534281, PubMed:12662155, PubMed:15039077, PubMed:15664838, PubMed:20536396, PubMed:20536396, PubMed:20536396, PubMed:27820798, PubMed:27820798, PubMed:27820798, PubMed:<a href="http://www.uniprot.org/citations/27820798" t

href="http://www.uniprot.org/citations/29967349" target="_blank">29967349, PubMed:32796818). Sequesters
the cleaved C-terminal part of NLRP1 and CARD8, which respectively constitute the active part of
the NLRP1 and CARD8 inflammasomes, in a ternary complex, thereby preventing their
oligomerization and activation (PubMed:<a href="http://www.uniprot.org/citations/34019797"

Cellular Location Cytoplasm

Tissue Location

Ubiquitously expressed, with highest levels in testis, placenta, prostate, muscle and brain

DPP8 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

DPP8 Antibody (N-term) Blocking Peptide - Background

DPP8 is a member of the peptidase S9B family, a small family of dipeptidyl peptidases that are able to cleave peptide substrates at a prolyl bond. The protein shares similarity with dipeptidyl peptidase IV in that it is ubiquitously expressed, and hydrolyzes the same substrates. These similarities suggest that, like dipeptidyl peptidase IV, this protein may play a role in T-cell activation and immune function.
