

PANK4 Antibody (N-term) Blocking Peptide

Synthetic peptide Catalog # BP7162a

Specification

PANK4 Antibody (N-term) Blocking Peptide - Product Information

Primary Accession

<u>Q9NVE7</u>

PANK4 Antibody (N-term) Blocking Peptide - Additional Information

Gene ID 55229

Other Names Pantothenate kinase 4, hPanK4, Pantothenic acid kinase 4, PANK4

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP7162a was selected from the N-term region of human PANK4. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions This product is for research use only. Not for use in diagnostic or therapeutic procedures.

PANK4 Antibody (N-term) Blocking Peptide - Protein Information

Name PANK4 (HGNC:19366)

Function

Phosphatase which shows a preference for 4'- phosphopantetheine and its oxidatively damaged forms (sulfonate or S- sulfonate), providing strong indirect evidence that the phosphatase activity pre-empts damage in the coenzyme A (CoA) pathway (PubMed:27322068). Hydrolyzing excess 4'-phosphopantetheine could constitute a directed overflow mechanism to prevent its oxidation to the S-sulfonate, sulfonate, or other forms (PubMed:27322068). Hydrolyzing 4'-phosphopantetheine sulfonate or S-sulfonate would forestall their conversion to inactive forms of CoA and acyl carrier protein (PubMed:27322068). May play a role in the physiological regulation of CoA intracellular levels (Probable).

Cellular Location

Cytoplasm {ECO:0000250|UniProtKB:Q923S8}.

Tissue Location

Widely expressed with high expression in the muscle (PubMed:11479594). Expressed in the retina and lens epithelium, mainly in ganglion cell layer, outer plexiform layer and retinal pigment layer (at protein level) (PubMed:30585370).

PANK4 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

PANK4 Antibody (N-term) Blocking Peptide - Background

PANK4 belongs to the pantothenate kinase family. Pantothenate kinase is a key regulatory enzyme in the biosynthesis of coenzyme A (CoA) in bacteria and mammalian cells. It catalyzes the first committed step in the universal biosynthetic pathway leading to CoA and is itself subject to regulation through feedback inhibition by CoA. This family member is most abundant in muscle but is expressed in all tissues.
