

STK35 Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP7243c**Specification**

STK35 Antibody (Center) Blocking Peptide - Product InformationPrimary Accession [Q8TDR2](#)**STK35 Antibody (Center) Blocking Peptide - Additional Information****Gene ID** 140901**Other Names**

Serine/threonine-protein kinase 35, CLP-36-interacting kinase 1, CLIK-1, PDLIM1-interacting kinase 1, Serine/threonine-protein kinase 35 L1, STK35, CLIK1, PDIK1, STK35L1

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP7243c](/product/products/AP7243c) was selected from the Center region of human STK35. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

STK35 Antibody (Center) Blocking Peptide - Protein Information**Name** STK35**Synonyms** CLIK1, PDIK1, STK35L1**Cellular Location**

Nucleus. Nucleus, nucleolus. Cytoplasm. Note=When associated with PDLIM1, it is mostly found in cytoplasm, localized to actin stress fibers (PubMed:11973348). However, PubMed:19756140 detected STK35 only in the nucleus, and the presence of PDLIM1 had no influence on its location.

Tissue Location

Expressed in testis.

STK35 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

STK35 Antibody (Center) Blocking Peptide - Background

STK35 can interact with PDLIM1/CLP-36 in the cytoplasm and localize to actin stress fibers. This kinase may be a regulator of actin stress fibers in nonmuscle cells. This protein has also been found in the nucleus.
