

## PIST Antibody (C-term) Blocking Peptide

Synthetic peptide Catalog # BP7262b

## **Specification**

## PIST Antibody (C-term) Blocking Peptide - Product Information

**Primary Accession** 

**Q9HD26** 

# PIST Antibody (C-term) Blocking Peptide - Additional Information

**Gene ID 57120** 

#### **Other Names**

Golgi-associated PDZ and coiled-coil motif-containing protein, CFTR-associated ligand, Fused in glioblastoma, PDZ protein interacting specifically with TC10, PIST, GOPC, CAL, FIG

## Target/Specificity

The synthetic peptide sequence used to generate the antibody <a href=/product/products/AP7262b>AP7262b</a> was selected from the C-term region of human PIST. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

## **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

## PIST Antibody (C-term) Blocking Peptide - Protein Information

Name GOPC (HGNC:17643)

## **Function**

Plays a role in intracellular protein trafficking and degradation (PubMed:<a href="http://www.uniprot.org/citations/11707463" target="\_blank">11707463</a>, PubMed:<a href="http://www.uniprot.org/citations/14570915" target="\_blank">14570915</a>, PubMed:<a href="http://www.uniprot.org/citations/15358775" target="\_blank">15358775</a>). May regulate CFTR chloride currents and acid-induced ASIC3 currents by modulating cell surface expression of both channels (By similarity). May also regulate the intracellular trafficking of the ADR1B receptor (PubMed:<a href="http://www.uniprot.org/citations/15358775" target="\_blank">15358775</a>). May play a role in autophagy (By similarity). Together with MARCHF2 mediates the ubiquitination and lysosomal degradation of CFTR (PubMed:<a href="http://www.uniprot.org/citations/23818989" target="\_blank">23818989</a>). Overexpression results in CFTR intracellular retention and lysosomaldegradation in the lysosomes (PubMed:<a

 $href="http://www.uniprot.org/citations/11707463" target="\_blank">11707463</a>, PubMed:<a href="http://www.uniprot.org/citations/14570915" target="_blank">14570915</a>).$ 

#### **Cellular Location**

Cytoplasm. Golgi apparatus membrane; Peripheral membrane protein. Golgi apparatus, trans-Golgi network membrane; Peripheral membrane protein Synapse. Postsynaptic density. Cell projection, dendrite. Note=Enriched in synaptosomal and postsynaptic densities (PSD) fractions. Expressed in cell bodies and dendrites of Purkinje cells. Localized at the trans-Golgi network (TGN) of spermatids and the medulla of round spermatides.

**Tissue Location**Ubiquitously expressed.

# PIST Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

## PIST Antibody (C-term) Blocking Peptide - Background

PDZ domains contain approximately 90 amino acids and bind the extreme C terminus of proteins in a sequence-specific manner. PIST, a PDZ domain-containing Golgi protein, was discovered in a yeast two-hybrid system as a binding partner to Beclin-1, a Bcl-2-interacting protein homologous to the yeast autophagy gene apg6. Experiments with mutant PIST proteins lacking the PDZ domain showed that PIST interaction with Beclin-1 through its coiled-coil domain can modulate Beclin-1 activity and suggest that PIST interactions with other proteins through its PDZ domain may regulate the activity of PIST and Beclin-1.
