

SCRG1 Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP7784c**Specification**

SCRG1 Antibody (Center) Blocking Peptide - Product InformationPrimary Accession [O75711](#)**SCRG1 Antibody (Center) Blocking Peptide - Additional Information****Gene ID** 11341**Other Names**

Scrapie-responsive protein 1, Scrapie-responsive gene 1 protein, ScRG-1, SCRG1

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP7784c](/products/AP7784c) was selected from the Center region of human SCRG1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

SCRG1 Antibody (Center) Blocking Peptide - Protein Information**Name** SCRG1**Cellular Location**

Secreted.

Tissue Location

Expressed abundantly in the central nervous system of adult, but not at all in fetal brain. High levels of SCRG1 transcripts are also observed in testis and aorta

SCRG1 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

SCRG1 Antibody (Center) Blocking Peptide - Background

Scrapie-responsive gene 1 is associated with neurodegenerative changes observed in transmissible spongiform encephalopathies. It may play a role in host response to prion-associated infections. The scrapie responsive protein 1 may be partly included in the membrane or secreted by the cells due to its hydrophobic N-terminus.
