

# HK3 (Hexokinase III) Antibody (N-term) Blocking peptide

Synthetic peptide Catalog # BP8139d

# **Specification**

### HK3 (Hexokinase III) Antibody (N-term) Blocking peptide - Product Information

Primary Accession P52790
Other Accession NP 002106

## HK3 (Hexokinase III) Antibody (N-term) Blocking peptide - Additional Information

**Gene ID 3101** 

#### **Other Names**

Hexokinase-3, Hexokinase type III, HK III, HK3

### Target/Specificity

The synthetic peptide sequence used to generate the antibody AP8139d was selected from the N-term region of human HK3. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

## HK3 (Hexokinase III) Antibody (N-term) Blocking peptide - Protein Information

Name HK3 (<u>HGNC:4925</u>)

### **Function**

Catalyzes the phosphorylation of hexose, such as D-glucose and D-fructose, to hexose 6-phosphate (D-glucose 6-phosphate and D- fructose 6-phosphate, respectively) (PubMed:<a href="http://www.uniprot.org/citations/8717435" target="\_blank">8717435</a>). Mediates the initial step of glycolysis by catalyzing phosphorylation of D-glucose to D-glucose 6-phosphate (PubMed:<a href="http://www.uniprot.org/citations/8717435" target=" blank">8717435</a>).

# HK3 (Hexokinase III) Antibody (N-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

# HK3 (Hexokinase III) Antibody (N-term) Blocking peptide - Background

Hexokinases phosphorylate glucose to produce glucose-6-phosphate, thus committing glucose to the glycolytic pathway. This gene encodes hexokinase 3. Similar to hexokinases 1 and 2, this allosteric enzyme is inhibited by its product glucose-6-phosphate.
