

PPM1B Antibody (Center L76) Blocking Peptide
Synthetic peptide
Catalog # BP8467a**Specification**

PPM1B Antibody (Center L76) Blocking Peptide - Product InformationPrimary Accession [O75688](#)**PPM1B Antibody (Center L76) Blocking Peptide - Additional Information****Gene ID** 5495**Other Names**

Protein phosphatase 1B, Protein phosphatase 2C isoform beta, PP2C-beta, PPM1B, PP2CB

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP8467a](/product/products/AP8467a) was selected from the Center region of human PPM1B. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

PPM1B Antibody (Center L76) Blocking Peptide - Protein Information**Name** PPM1B**Synonyms** PP2CB**Function**

Enzyme with a broad specificity. Dephosphorylates CDK2 and CDK6 in vitro. Dephosphorylates PRKAA1 and PRKAA2. Inhibits TBK1- mediated antiviral signaling by dephosphorylating it at 'Ser-172'. Plays an important role in the termination of TNF-alpha-mediated NF- kappa-B activation through dephosphorylating and inactivating IKBKB/IKKB.

Cellular Location

Cytoplasm, cytosol. Membrane {ECO:0000250|UniProtKB:P36993}; Lipid-anchor {ECO:0000250|UniProtKB:P36993}. Note=Weakly associates at the membrane and N-myristoylation mediates the membrane localization {ECO:0000250|UniProtKB:P36993}

Tissue Location

Highly expressed in heart and skeletal muscle.

PPM1B Antibody (Center L76) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

PPM1B Antibody (Center L76) Blocking Peptide - Images**PPM1B Antibody (Center L76) Blocking Peptide - Background**

PPM1B is a member of the PP2C family of Ser/Thr protein phosphatases. PP2C family members are known to be negative regulators of cell stress response pathways. This phosphatase has been shown to dephosphorylate cyclin-dependent kinases (CDKs), and thus may be involved in cell cycle control. Overexpression of this phosphatase is reported to cause cell-growth arrest or cell death.
