

MC3R Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP8719c**Specification**

MC3R Antibody (Center) Blocking Peptide - Product InformationPrimary Accession [P41968](#)**MC3R Antibody (Center) Blocking Peptide - Additional Information****Gene ID** 4159**Other Names**

Melanocortin receptor 3, MC3-R, MC3R

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP8719c](/products/AP8719c) was selected from the Center region of human MC3R. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

MC3R Antibody (Center) Blocking Peptide - Protein Information**Name** MC3R**Function**

Receptor for MSH (alpha, beta and gamma) and ACTH. This receptor is mediated by G proteins which activate adenylate cyclase. Required for expression of anticipatory patterns of activity and wakefulness during periods of limited nutrient availability and for the normal regulation of circadian clock activity in the brain.

Cellular Location

Cell membrane; Multi-pass membrane protein.

Tissue Location

Brain, placental, and gut tissues.

MC3R Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

MC3R Antibody (Center) Blocking Peptide - Background

MC3R is a G-protein-coupled receptor for melanocyte-stimulating hormone and adrenocorticotrophic hormone that is expressed in tissues other than the adrenal cortex and melanocytes. This gene maps to the same region as the locus for benign neonatal epilepsy.
