

# **CDC5L Antibody (Center) Blocking Peptide**

Synthetic peptide Catalog # BP8949c

## **Specification**

## CDC5L Antibody (Center) Blocking Peptide - Product Information

Primary Accession Q99459

# CDC5L Antibody (Center) Blocking Peptide - Additional Information

Gene ID 988

#### **Other Names**

Cell division cycle 5-like protein, Cdc5-like protein, Pombe cdc5-related protein, CDC5L, KIAA0432, PCDC5RP

# **Target/Specificity**

The synthetic peptide sequence used to generate the antibody <a

href=/products/AP8949c>AP8949c</a> was selected from the Center region of human CDC5L. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

### CDC5L Antibody (Center) Blocking Peptide - Protein Information

### Name CDC5L

Synonyms KIAA0432, PCDC5RP

### **Function**

DNA-binding protein involved in cell cycle control. May act as a transcription activator. Plays a role in pre-mRNA splicing as core component of precatalytic, catalytic and postcatalytic spliceosomal complexes (PubMed:<a href="http://www.uniprot.org/citations/11991638" target="blank">11991638</a>, PubMed:<a href="http://www.uniprot.org/citations/20176811"

target="\_blank">20176811</a>, PubMed:<a href="http://www.uniprot.org/citations/28502770" target="\_blank">28502770</a>, PubMed:<a href="http://www.uniprot.org/citations/28076346"

target="\_blank">28076346</a>, PubMed:<a href="http://www.uniprot.org/citations/29361316"

target="\_blank">29361316</a>, PubMed:<a href="http://www.uniprot.org/citations/29360106" target=" blank">29360106</a>, PubMed:<a href="http://www.uniprot.org/citations/29301961"

target=" blank">29301961</a>, PubMed:<a href="http://www.uniprot.org/citations/30728453" target="blank">30728453</a>, PubMed:<a href="http://www.uniprot.org/citations/30705154" target="blank">30705154</a>). Component of the PRP19-CDC5L complex that forms an integral part of the spliceosome and is required for activating pre-mRNA splicing. The PRP19-CDC5L complex may also play a role in the response to DNA damage (DDR) (PubMed: <a href="http://www.uniprot.org/citations/20176811" target=" blank">20176811</a>). As a component of the minor spliceosome, involved in the splicing of U12- type introns in pre-mRNAs (Probable).

#### **Cellular Location**

Nucleus. Nucleus speckle. Cytoplasm Note=May shuttle between cytoplasm and nucleus

#### **Tissue Location**

Ubiquitously expressed in both fetal and adult tissues.

## CDC5L Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

## CDC5L Antibody (Center) Blocking Peptide - Background

The protein is a significant similarity with Schizosaccharomyces pombe cdc5 gene product, which is a cell cycle regulator important for G2/M transition. This protein has been demonstrated to act as a positive regulator of cell cycle G2/M progression. It was also found to be an essential component of a non-snRNA spliceosome, which contains at least five additional protein factors and is required for the second catalytic step of pre-mRNA splicing.
