

ADAMDEC1 Antibody (N-term) Blocking Peptide

Synthetic peptide Catalog # BP9119a

Specification

ADAMDEC1 Antibody (N-term) Blocking Peptide - Product Information

Primary Accession

015204

ADAMDEC1 Antibody (N-term) Blocking Peptide - Additional Information

Gene ID 27299

Other Names

ADAM DEC1, 3424-, A disintegrin and metalloproteinase domain-like protein decysin-1, ADAM-like protein decysin-1, ADAMDEC1

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP9119a was selected from the N-term region of human ADAMDEC1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ADAMDEC1 Antibody (N-term) Blocking Peptide - Protein Information

Name ADAMDEC1

Function

May play an important role in the control of the immune response and during pregnancy.

Cellular Location

Secreted.

Tissue Location

Expressed highly in the small intestine and appendix, moderately in lymph node, mucosal lining of the colon, thymus, spleen and very weakly in the bone marrow. Predominantly expressed in dendritic cells (DC) of the germinal center. Weakly expressed in monocyte and highly expressed in macrophage. Absent in immature DC.

ADAMDEC1 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

• Blocking Peptides
