

**IP6K2 Antibody (Center) Blocking Peptide**  
**Synthetic peptide**  
**Catalog # BP9185c****Specification**

---

**IP6K2 Antibody (Center) Blocking Peptide - Product Information**Primary Accession [Q9UHH9](#)**IP6K2 Antibody (Center) Blocking Peptide - Additional Information****Gene ID** 51447**Other Names**

Inositol hexakisphosphate kinase 2, InsP6 kinase 2, P(i)-uptake stimulator, PiUS, IP6K2, IHPK2

**Target/Specificity**

The synthetic peptide sequence used to generate the antibody [AP9185c](/products/AP9185c) was selected from the Center region of human IP6K2. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**IP6K2 Antibody (Center) Blocking Peptide - Protein Information****Name** IP6K2 {ECO:0000303|PubMed:30624931}**Synonyms** IHPK2**Function**

Converts inositol hexakisphosphate (InsP6) to diphosphoinositol pentakisphosphate (InsP7/PP-InsP5).

**Cellular Location**

Nucleus.

**IP6K2 Antibody (Center) Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

#### **IP6K2 Antibody (Center) Blocking Peptide - Background**

IP6K2 belongs to the inositol phosphokinase (IPK) family. This protein is likely responsible for the conversion of inositol hexakisphosphate (InsP6) to diphosphoinositol pentakisphosphate (InsP7/PP-InsP5). It may also convert 1,3,4,5,6-pentakisphosphate (InsP5) to PP-InsP4 and affect the growth suppressive and apoptotic activities of interferon-beta in some ovarian cancers.
