

TSPAN6 Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP9224b**Specification**

TSPAN6 Antibody (C-term) Blocking Peptide - Product InformationPrimary Accession [O43657](#)**TSPAN6 Antibody (C-term) Blocking Peptide - Additional Information****Gene ID** 7105**Other Names**

Tetraspanin-6, Tspan-6, A15 homolog, Putative NF-kappa-B-activating protein 321, T245 protein, Tetraspanin TM4-D, Transmembrane 4 superfamily member 6, TSPAN6, TM4SF6

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP9224b](/products/AP9224b) was selected from the C-term region of human TSPAN6. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

TSPAN6 Antibody (C-term) Blocking Peptide - Protein Information**Name** TSPAN6**Synonyms** TM4SF6**Cellular Location**

Membrane; Multi-pass membrane protein.

TSPAN6 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

TSPAN6 Antibody (C-term) Blocking Peptide - Images**TSPAN6 Antibody (C-term) Blocking Peptide - Background**

The protein is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. This encoded protein is a cell surface glycoprotein and is highly similar in sequence to the transmembrane 4 superfamily member 2.
