

ACTR5 Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP9266b**Specification**

ACTR5 Antibody (C-term) Blocking Peptide - Product InformationPrimary Accession [Q9H9F9](#)**ACTR5 Antibody (C-term) Blocking Peptide - Additional Information****Gene ID** 79913**Other Names**

Actin-related protein 5, hARP5, Sarcoma antigen NY-SAR-16, ACTR5, ARP5

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP9266b](/products/AP9266b) was selected from the C-term region of human ACTR5. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ACTR5 Antibody (C-term) Blocking Peptide - Protein Information**Name** ACTR5**Synonyms** ARP5**Function**

Proposed core component of the chromatin remodeling INO80 complex which is involved in transcriptional regulation, DNA replication and probably DNA repair. Involved in DNA double-strand break repair and UV-damage excision repair.

Cellular Location

Nucleus. Cytoplasm. Note=Predominantly nuclear but undergoes nucleo-cytoplasmic shuttling (PubMed:19014934). Localized to interphase nuclei, but not nucleoli; excluded from chromosomes as mitosis progresses (PubMed:18163988)

ACTR5 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Blocking Peptides](#)

ACTR5 Antibody (C-term) Blocking Peptide - Images**ACTR5 Antibody (C-term) Blocking Peptide - Background**

ACTR5 may be involved in transcription regulation via its interaction with the INO80 complex, a chromatin remodeling complex
