

TFPT Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP9304a**Specification**

TFPT Antibody (N-term) Blocking Peptide - Product Information

Primary Accession [POC1Z6](#)

TFPT Antibody (N-term) Blocking Peptide - Additional Information

Gene ID 29844

Other Names

TCF3 fusion partner, INO80 complex subunit F, Protein FB1, TFPT, INO80F

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP9304a](/products/AP9304a) was selected from the N-term region of human TFPT. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

TFPT Antibody (N-term) Blocking Peptide - Protein Information

Name TFPT

Synonyms INO80F

Function

Appears to promote apoptosis in a p53/TP53-independent manner.

Cellular Location

Nucleus.

TFPT Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

TFPT Antibody (N-term) Blocking Peptide - Images**TFPT Antibody (N-term) Blocking Peptide - Background**

TFPT component of the chromatin-remodeling INO80 complex which, in addition to chromatin remodeling implicated in crucial functions such as DNA repair, checkpoint regulation, DNA replication, telomere maintenance and chromosome segregation. This protein appears to promote apoptosis in a TP53/p53-independent manner.
