GALNTL5 Antibody (C-term) Blocking Peptide - Protein Information**Name** GALNTL5**Synonyms** GALNT15**Function**

Probable inactive glycosyltransferase required during spermatid development. May participate in protein loading into the acrosomes and accumulation of ubiquitin-proteasome systems around the head-tail coupling apparatus region.

Cellular Location

Late endosome membrane; Single-pass type II membrane protein. Note=Localizes to the juxtanuclear region, possibly the late endosome. Not localized in the Golgi apparatus in round spermatids (By similarity).

Tissue Location

Mainly expressed in testis. Weakly or not expressed in other tissues.
