

MAFA Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP9440c**Specification**

MAFA Antibody (Center) Blocking Peptide - Product InformationPrimary Accession [Q8NHW3](#)**MAFA Antibody (Center) Blocking Peptide - Additional Information****Gene ID** 389692**Other Names**

Transcription factor MafA, Pancreatic beta-cell-specific transcriptional activator, Transcription factor RIPE3b1, V-maf musculoaponeurotic fibrosarcoma oncogene homolog A, MAFA

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

MAFA Antibody (Center) Blocking Peptide - Protein Information**Name** MAFA**Function**

Transcription factor that activates insulin gene expression (PubMed:12011435, PubMed:15993959). Acts synergistically with NEUROD1/BETA2 and PDX1 (PubMed:15993959). Binds the insulin enhancer C1/RIPE3b element (PubMed:12011435). Binds to consensus TRE-type MARE 5'-TGCTGACTCAGCA-3' DNA sequence (PubMed:23148532, PubMed:29339498).

Cellular Location

Nucleus {ECO:0000255|PROSITE-ProRule:PRU00978, ECO:0000269|PubMed:12011435, ECO:0000269|PubMed:12917329}

Tissue Location

Expressed in the islets of Langerhans (at protein level).

MAFA Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

MAFA Antibody (Center) Blocking Peptide - Images

MAFA Antibody (Center) Blocking Peptide - Background

MAFA is a transcription factor that binds RIPE3b, a conserved enhancer element that regulates pancreatic beta cell-specific expression of the insulin gene.
