

### **GMDS Antibody (Center) Blocking Peptide**

Synthetic peptide Catalog # BP9496c

### **Specification**

### **GMDS Antibody (Center) Blocking Peptide - Product Information**

**Primary Accession** 

060547

## **GMDS Antibody (Center) Blocking Peptide - Additional Information**

**Gene ID 2762** 

#### **Other Names**

GDP-mannose 4, 6 dehydratase, GDP-D-mannose dehydratase, GMD, GMDS

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

## **Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

### **GMDS Antibody (Center) Blocking Peptide - Protein Information**

Name GMDS (HGNC:4369)

#### **Function**

Catalyzes the conversion of GDP-D-mannose to GDP-4-dehydro-6- deoxy-D-mannose.

#### **Tissue Location**

Highly expressed in pancreas and small intestine. Expressed in thymus, protstate, colon, heart, placenta, liver and kidney. Expressed at low levels in spleen, testis, brain and lung

### **GMDS Antibody (Center) Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

#### • Blocking Peptides

## GMDS Antibody (Center) Blocking Peptide - Background

GDP-mannose 4,6-dehydratase (GMD; EC 4.2.1.47) catalyzes the conversion of GDP-mannose to

Tel: 858.875.1900 Fax: 858.875.1999

GDP-4-keto-6-deoxymannose, the first step in the synthesis of GDP-fucose from GDP-mannose, using NADP+ as a cofactor. The second and third steps of the pathway are catalyzed by a single enzyme, GDP-keto-6-deoxymannose 3,5-epimerase, 4-reductase, designated FX in humans (MIM 137020).
