

**GATA5 Antibody (Center) Blocking Peptide**  
**Synthetic peptide**  
**Catalog # BP9505c****Specification**

---

**GATA5 Antibody (Center) Blocking Peptide - Product Information**Primary Accession [Q9BW5](#)**GATA5 Antibody (Center) Blocking Peptide - Additional Information****Gene ID** 140628**Other Names**

Transcription factor GATA-5, GATA-binding factor 5, GATA5

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**GATA5 Antibody (Center) Blocking Peptide - Protein Information****Name** GATA5 ([HGNC:15802](#))**Function**

Transcription factor required during cardiovascular development (PubMed:<a href="http://www.uniprot.org/citations/23289003" target="\_blank">23289003</a>). Plays an important role in the transcriptional program(s) that underlies smooth muscle cell diversity (By similarity). Binds to the functionally important CEF-1 nuclear protein binding site in the cardiac-specific slow/cardiac troponin C transcriptional enhancer (PubMed:<a href="http://www.uniprot.org/citations/25543888" target="\_blank">25543888</a>).

**Cellular Location**

Nucleus.

**GATA5 Antibody (Center) Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

**GATA5 Antibody (Center) Blocking Peptide - Background**

GATA5 is a transcription factor that contains two GATA-type zinc fingers. This protein is known to bind to hepatocyte nuclear factor-1alpha (HNF-1alpha), and this interaction is essential for cooperative activation of the intestinal lactase-phlorizin hydrolase promoter. In other organisms, similar proteins may be involved in the establishment of cardiac smooth muscle cell diversity.
