

EIF2A Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP9521c**Specification**

EIF2A Antibody (Center) Blocking Peptide - Product InformationPrimary Accession [Q9BY44](#)**EIF2A Antibody (Center) Blocking Peptide - Additional Information****Gene ID** 83939**Other Names**

Eukaryotic translation initiation factor 2A, eIF-2A, 65 kDa eukaryotic translation initiation factor 2A, Eukaryotic translation initiation factor 2A, N-terminally processed, EIF2A

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

EIF2A Antibody (Center) Blocking Peptide - Protein Information**Name** EIF2A**Function**

Functions in the early steps of protein synthesis of a small number of specific mRNAs. Acts by directing the binding of methionyl- tRNAi to 40S ribosomal subunits. In contrast to the eIF-2 complex, it binds methionyl-tRNAi to 40S subunits in a codon-dependent manner, whereas the eIF-2 complex binds methionyl-tRNAi to 40S subunits in a GTP-dependent manner.

Tissue Location

Widely expressed. Expressed at higher level in pancreas, heart, brain and placenta.

EIF2A Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

EIF2A Antibody (Center) Blocking Peptide - Background

EIF2A is a 65-kD protein that catalyzes the formation of puromycin-sensitive 80S preinitiation complexes (Zoll et al., 2002 [PubMed 12133843]).
