

NEU1 Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP9697c

Specification

NEU1 Antibody (Center) Blocking Peptide - Product Information

Primary Accession [P01178](#)

NEU1 Antibody (Center) Blocking Peptide - Additional Information

Gene ID 5020

Other Names

Oxytocin-neurophysin 1, OT-NPI, Oxytocin, Ocytocin, Neurophysin 1, OXT, OT

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

NEU1 Antibody (Center) Blocking Peptide - Protein Information

Name OXT

Synonyms OT

Function

Neurophysin 1 specifically binds oxytocin.

Cellular Location

Secreted.

NEU1 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

NEU1 Antibody (Center) Blocking Peptide - Background

There are two proteins encoded by this gene, oxytocin and neurophysin I. Oxytocin is posterior pituitary hormone which is synthesized as an inactive precursor in the hypothalamus along with its carrier protein neurophysin I. Together with neurophysin, it is packaged into neurosecretory vesicles and transported axonally to the nerve endings in the neurohypophysis, where it is either stored or secreted into the bloodstream. The precursor seems to be activated while it is being transported along the axon to the posterior pituitary. This hormone contracts smooth muscle during parturition and lactation. It is also involved in cognition, tolerance, adaptation and complex sexual and maternal behaviour, as well as in the regulation of water excretion and cardiovascular functions.
