

Recombinant Human FGF-19

Catalog # PBG10095

Specification

Recombinant Human FGF-19 - Product Information

Recombinant Human FGF-19 - Additional Information

Description

The FGF family plays central roles during prenatal development and postnatal growth and regeneration of a variety of tissues, by promoting cellular proliferation and differentiation. FGF-19, a member of the FGF family, is a high affinity heparin dependent ligand for FGFR4. FGF-19 is expressed during the brain development and embryogenesis. Recombinant human FGF-19 is a 21.8 kDa protein containing 195 amino acid residues.

BiologicalActivity

Determined by a cell proliferation assay using balb/c 3T3 cells. The expected ED₅₀ for this effect is 100-150 ng/ml.

Authenticity Verified by N-terminal and Mass Spectrometry analyses (when applicable).

Endotoxin Endotoxin level is <0.1 ng/ μg of protein (<1EU/ μg).

Protein Content Verified by UV Spectroscopy and/or SDS-PAGE gel.

Storage -20°C

Precautions

Recombinant Human FGF-19 is for research use only and not for use in diagnostic or therapeutic procedures.

Recombinant Human FGF-19 - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- <u>Dot Blot</u>
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
