

# **Recombinant Murine MCP-3 (CCL7)**

Catalog # PBG10286

### **Specification**

### Recombinant Murine MCP-3 (CCL7) - Product Information

#### Recombinant Murine MCP-3 (CCL7) - Additional Information

## **Description**

The MCP proteins belong to the CC chemokine family, and signal through CCR2 and, with the exception of MCP-1, other CCR receptors. The MCP proteins chemoattract and activate monocytes, activated T cells, basophils, NK cells, and immature dendritic cells. The MCP family cross- reacts across species. Recombinant murine MCP-3 is an 8.5 kDa protein containing 74 amino acid residues including the four highly conserved cysteine residues present in the CC chemokines.

## **Biological**Activity

Determined by its ability to chemoattract Balb/C M spleen MNCs using a concentration range of 10.0-100.0 ng/ml.

#### Authenticity

Verified by N-terminal and Mass Spectrometry analyses (when applicable).

#### **Endotoxin**

Endotoxin level is <0.1 ng/  $\mu g$  of protein ( $<1EU/ \mu g$ ).

#### **Protein Content**

Verified by UV Spectroscopy and/or SDS-PAGE gel.

### Storage

-20°C

#### **Precautions**

Recombinant Murine MCP-3 (CCL7) is for research use only and not for use in diagnostic or therapeutic procedures.

#### Recombinant Murine MCP-3 (CCL7) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- <u>Immunofluorescence</u>
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
