

Apo-D, human recombinant protein
Apolipoprotein D, Apo-D, ApoD
Catalog # PBV10224r**Specification**

Apo-D, human recombinant protein - Product info

Primary Accession [P05089](#)
Calculated MW **19.8 kDa KDa**

Apo-D, human recombinant protein - Additional Info

Gene ID **347**
Gene Symbol **Apo-D**
Other Names
Apolipoprotein D, Apo-D, ApoD, Apolipoprotein, apolipoproteins,

Gene Source **Human**
Source **E. coli**
Assay&Purity **SDS-PAGE; ≥95%**
Assay2&Purity2 **HPLC; ≥95%**
Recombinant **Yes**
Target/Specificity
ApoD

Application Notes

Reconstitute in dH₂O to a working volume of 0.5 mg/ml and let the lyophilized pellet dissolve completely. This solution can then be diluted into other aqueous buffers and stored at 4°C for 1 week or -20°C for future use.

Format

Lyophilized protein

Storage

-20°C; Lyophilized from 1 mg/ml in 4 mM KH₂PO₄, 16 mM Na₂HPO₄ and 115 mM NaCl pH7.5.

Apo-D, human recombinant protein - Protocols

Provided below are standard protocols that you may find useful for product applications.

Apo-D, human recombinant protein - Background

Apolipoprotein-D (Apo-D) is mainly associated with high density lipoproteins in human plasma. It is expressed in numerous tissues having high levels of expression in spleen, testes and brain. Apo-D is a multi-ligand, multi-functional transporter and transports a ligand from 1 cell to another within an organ, scavenge a ligand within an organ for transport to the blood or could transport a ligand from the circulation to specific cells within a tissue. The recombinant human Apo-D expressed from E.Coli is a single, non-glycosylated, Polypeptide chain containing 174 amino acids and having a molecular mass of 19.8 kDa.
