

S-Tag Blocking Peptide
Catalog # PBV10479b**Specification**

S-Tag Blocking Peptide - Product Information**S-Tag Blocking Peptide - Additional Information****Application & Usage**

The peptide is used for blocking the antibody activity of S-Tag. It usually blocks the antibody activity completely in Western blot analysis by incubating the peptide with equal volume of antibody for 30-60 minutes at 37°C.

Target/Specificity

S-tag

Formulation

50 µg (0.5 mg/ml) in phosphate buffered saline (PBS), pH 7.2, containing 50% glycerol, 1% BSA and 0.02% thimerosal.

Background Descriptions**Precautions**

S-Tag Blocking Peptide is for research use only and not for use in diagnostic or therapeutic procedures.

S-Tag Blocking Peptide - Protein Information**S-Tag Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.
