

Ghrelin Blocking Peptide (N3 modified)

Catalog # PBV10502b

Specification

Ghrelin Blocking Peptide (N3 modified) - Product Information

Primary Accession Other Accession Gene ID Calculated MW <u>09UBU3</u> AAU93610 51738 12911

Ghrelin Blocking Peptide (N3 modified) - Additional Information

Gene ID 51738

Application & Usage

The peptide is used for blocking the antibody activity of Ghrelin. It usually blocks the antibody activity completely in Western blot analysis by incubating the peptide with equal volume of antibody for 30-60 minutes at 37°C.

Other Names

Appetite-regulating hormone, Growth hormone secretagogue, Growth hormone-releasing peptide, Motilin-related peptide, Protein M46, Ghrelin-27, Ghrelin-28, Ghrelin, Obestatin, GHRL, MTLRP

Target/Specificity Ghrelin (N3 modified)

Formulation 50 μ g (0.5 mg/ml) in phosphate buffered saline (PBS), pH 7.2, containing 50% glycerol, 1% BSA and 0.02% thimerosal.

Reconstitution & Storage -20 °C

Background Descriptions

Precautions

Ghrelin Blocking Peptide (N3 modified) is for research use only and not for use in diagnostic or therapeutic procedures.

Ghrelin Blocking Peptide (N3 modified) - Protein Information

Name GHRL

Synonyms MTLRP

Function

[Ghrelin-27]: Ghrelin is the ligand for growth hormone secretagogue receptor type 1 (GHSR) (PubMed:10604470). Induces the release of growth hormone from the pituitary (PubMed:10604470). Has an appetite-stimulating effect, induces adiposity and stimulates gastric acid secretion. Involved in growth regulation.

Cellular Location Secreted.

Tissue Location

Highest level in stomach. All forms are found in serum as well. Other tissues compensate for the loss of ghrelin synthesis in the stomach following gastrectomy

Ghrelin Blocking Peptide (N3 modified) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
