

C5a, human recombinant protein
Recombinant human C5a
Catalog # PBV10530r**Specification**

C5a, human recombinant protein - Product info

Calculated MW (74 amino acids) KDa

C5a, human recombinant protein - Additional Info**Other Names**

C5a anaphylatoxin chemotactic receptor, C5a anaphylatoxin chemotactic receptor (C5a-R), (C5aR,) (CD antigen CD88), C5AR1, C5AR, C5R1

Source

Assay&Purity

Assay2&Purity2

Recombinant

E. coli**SDS-PAGE; ≥95%****HPLC;****Yes****Application Notes**

Reconstitute to a concentration of 1.0 mg/ml in ice-cold H₂O containing 2.5 mg/ml BSA. The solution should be aliquoted and immediately stored at -70°C for future use. Frozen/thaw will result in some loss of activity.

Format

Lyophilized protein

Storage

-20°C; Lyophilized with no additives

C5a, human recombinant protein - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

C5a, human recombinant protein - Images**C5a, human recombinant protein - Background**

Human complement C5a is a 74-amino acid glycopeptide generated during complement activation from the α -chain of complement C5. C5a is a potent chemotactic factor for human peripheral blood neutrophils and monocytes, and is believed to play an important role in a number of inflammatory

conditions. The 74 amino acid, human C5a protein expressed in E. coli has an activity similar to that of serum derived C5a based on enzyme assay of myeloperoxidase release.
