

### BMP-11/GDF-11, human recombinant protein

Growth/Differentiation Factor-11, BMP-11 Catalog # PBV10785r

# **Specification**

### BMP-11/GDF-11, human recombinant protein - Product info

Primary Accession O95390
Calculated MW 25 kDa KDa

## BMP-11/GDF-11, human recombinant protein - Additional Info

Gene ID 10220
Gene Symbol GDF11

**Other Names** 

Growth/Differentiation Factor-11, BMP-11

Gene Source Human Source E.coli

Assay&Purity SDS-PAGE; ≥98%

Assay2&Purity2 HPLC;
Recombinant Yes

Sequence NLGLDCDEHS SESRCCRYPL TVDFEAFGWD

WIIAPKRYKA NYCSGQCEYM FMQKYPHTHL VQQANPRGSA GPCCTPTKMS PINMLYFNDK

**QQIIYGKIPG MVVDRCGCS** 

Target/Specificity

**BMP-11** 

## **Application Notes**

Centrifuge the vial prior to opening. Reconstitute in water to a concentration of 0.1-1.0 mg/ml. Keep pH below 5.0. Do not vortex. This solution can be stored at 2-8°C for up to 1 week. For extended storage, it is recommended to further dilute in a buffer containing a carrier protein (example 0.1% BSA) and store in working aliquots at -20°C to -80°C.

#### **Format**

Lyophilized powder

# **Storage**

-20°C; Sterile filtered through a 0.2 micron filter. Lyophilized with no additives.

# BMP-11/GDF-11, human recombinant protein - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry

- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

## BMP-11/GDF-11, human recombinant protein - Images

## BMP-11/GDF-11, human recombinant protein - Background

GDF-11 is a myostatin-homologous protein that acts as an inhibitor of nerve tissue growth. GDF-11 has been shown to suppress neurogenesis through a myostatin-like pathway, which involves arrest of progenitor cell cycle in the G1 phase. Similarities between myostatin and GDF-11, which are 90% identical in their amino acid sequence, suggests that the regulatory mechanisms responsible for maintaining proper tissue size during neural and muscular development might be the same. Recombinant human GDF-11 is a 25.0 kDa disulfide-linked homodimer containing two 109 amino acid polypeptide chains. It is highly homologous to myostatin/GDF-8 sharing 90% amino acid sequence identity.
