

**Human CellExp ErbB1/EGFR, mouse recombinant protein**  
**EGFR, ERBB, ERBB1, HER1, PIG61, mENA**  
**Catalog # PBV11025r****Specification**

---

**Human CellExp ErbB1/EGFR, mouse recombinant protein - Product info**Primary Accession  
Calculated MW[Q01279](#)

This protein has a C-terminal 6×His tag and has a calculated MW of 70 kDa. The predicted N-terminus is Leu 25. In DTT-reduced SDS-PAGE, protein migrates as 110-115 kDa. KDa

**Measured by its binding ability in a functional ELISA. Immobilized mouse EGF at 10 µg/ml can bind mouse EGFR with a linear range of 2.5-1000 ng/ml.**

**Target/Specificity**  
ErbB1**Application Notes**

Centrifuge the vial prior to opening. Reconstitute in sterile PBS, pH 7.4 to a concentration of 50 µg/ml. Do not vortex. This solution can be stored at 2-8°C for up to 1 month. For extended storage, it is recommended to store at -20°C.

**Format**  
Lyophilized**Storage**  
-20°C; Lyophilized from 0.22 µm filtered solution in PBS, pH7.4. Generally 5-8% Mannitol or trehalose is added as a protectant before lyophilization.**Human CellExp ErbB1/EGFR, mouse recombinant protein - Protocols**

Provided below are standard protocols that you may find useful for product applications.

#### **Human CellExp ErbB1/EGFR, mouse recombinant protein - Background**

The epidermal growth factor receptor (EGFR; ErbB-1; HER1) is the cell-surface receptor for members of the epidermal growth factor family (EGF-family) of extracellular protein ligands. The epidermal growth factor receptor is a member of the ErbB family of receptors, a subfamily of four closely related receptor tyrosine kinases: EGFR (ErbB-1), HER2/c-neu (ErbB-2), Her 3 (ErbB-3) and Her 4 (ErbB-4). Mutations affecting EGFR expression or activity could result in cancer.
