

Bromodomain-containing Protein 4 (BrD4, domain 49-170aa), human recombinant protein**Recombinant Human Bromodomain-containing Protein 4 (BrD4, domain 49-170aa)
Catalog # PBV11219r****Specification**

Bromodomain-containing Protein 4 (BrD4, domain 49-170aa), human recombinant protein - Product info

Primary Accession	O60885
Calculated MW	14.6 kDa (122 aa, 49-170 aa) KDa

Bromodomain-containing Protein 4 (BrD4, domain 49-170aa), human recombinant protein - Additional Info

Gene ID	23476
Gene Symbol	BRD4
Other Names	
BRD4, Protein HUNK1, HUNK1	
Gene Source	Human
Source	E. coli
Assay&Purity	SDS-PAGE; ≥98%
Assay2&Purity2	N/A;
Recombinant	Yes
Target/Specificity	
BRD4	

Format

Liquid

Storage

-80°C; rh-BrD4 is supplied as a solution in 50mM Tris, pH 8.0, 150 mM NaCl and 10% glycerol.

Bromodomain-containing Protein 4 (BrD4, domain 49-170aa), human recombinant protein - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Bromodomain-containing Protein 4 (BrD4, domain 49-170aa), human recombinant protein - Images

**Bromodomain-containing Protein 4 (BrD4, domain 49-170aa), human recombinant protein
- Background**

BrD4 protein is homologous to the murine protein MCAP, which associates with chromosomes during mitosis, and to the human RING3 protein. Each of these proteins contains two bromodomains, a conserved sequence motif which may be involved in chromatin targeting. It plays a role in a process governing chromosomal dynamics during mitosis. BioVision's BrD4 recombinant protein includes Bromo 2 domain (49-170 aa) with an N-terminal His-tag.

**Bromodomain-containing Protein 4 (BrD4, domain 49-170aa), human recombinant protein
