

BLVRA, human recombinant protein
Biliverdin reductase A, BLVR, BVR, BVRA
Catalog # PBV11386r**Specification**

BLVRA, human recombinant protein - Product info

Primary Accession	P53004
Concentration	1
Calculated MW	33.3 kDa (295 aa, 3-296 aa) KDa

BLVRA, human recombinant protein - Additional Info

Gene ID	644
Gene Symbol	BLVRA
Other Names	
Biliverdin reductase A, BLVR, BVR, BVRA	
Gene Source	Human
Source	E.coli
Assay&Purity	SDS-PAGE; ≥90%
Assay2&Purity2	N/A;
Recombinant	Yes
Results	Specific activity is > 30 pmoles/min/ µg.

BLVRA, human recombinant protein - Background

BLVRA, also known as biliverdin reductase A, belongs to the gfo/idh/mocA family. This protein is an enzyme that converts biliverdin to bilirubin, converting a double-bond between the second and third pyrrole ring into a single-bond. (Bilirubin + NAD (P) + = biliverdin + NAD (P) H) Recombinant BLVRA protein was expressed in E.coli and purified by using conventional chromatography techniques.
