

# MCF-7 Whole Cell Lysate

Catalog # PL2030a

# **Specification**

### MCF-7 Whole Cell Lysate - Additional Information

### **Application Notes**

Ready-to-use MCF-7 whole cell lysate is prepared as a positive control for separation by SDS-PAGE and subsequent western blot analysis. Heat lysate to 95°C for 5 minutes and rapidly cool. The recommended loading volume per lane is 2~10 ul depending on the size format of your gel.

#### **Format**

Whole lysate is stored in 1 X SDS 0.3% beta-mercaptoethanol sample buffer.

### Storage

Store vial at -70°C or colder. For extended storage, aliquot contents to minimize freeze/thaw cycles. Storage at -20°C will be stable for three months, storage at-70°C will be stable for one year.

### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

## MCF-7 Whole Cell Lysate - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- <u>Immunofluorescence</u>
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
