

Biotinylated p21Cip1-S146 Phospho Peptide

Synthetic Peptide Catalog # SP2036b

Specification

Biotinylated p21Cip1-S146 Phospho Peptide - Product Information

Primary Accession O19002
Other Accession P38936

Sequence Biotin-GRKRRQT(pS)MTDFYHS

Biotinylated p21Cip1-S146 Phospho Peptide - Additional Information

Gene ID 493943

Other Names

Cyclin-dependent kinase inhibitor 1, CDK-interacting protein 1, p21, CDKN1A, CIP1, WAF1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

Biotinylated p21Cip1-S146 Phospho Peptide - Protein Information

Name CDKN1A

Synonyms CIP1, WAF1

Function

May be involved in p53/TP53 mediated inhibition of cellular proliferation in response to DNA damage (By similarity). Binds to and inhibits cyclin-dependent kinase activity, preventing phosphorylation of critical cyclin-dependent kinase substrates and blocking cell cycle progression (By similarity). Functions in the nuclear localization and assembly of cyclin D-CDK4 complex and promotes its kinase activity towards RB1 (By similarity). At higher stoichiometric ratios, inhibits the kinase activity of the cyclin D-CDK4 complex (By similarity). Inhibits DNA synthesis by DNA polymerase delta by competing with POLD3 for PCNA binding (By similarity). Plays an important role in controlling cell cycle progression and DNA damage-induced G2 arrest (By similarity).

Cellular Location

Cytoplasm {ECO:0000250|UniProtKB:P38936}. Nucleus {ECO:0000250|UniProtKB:P38936}
